POTTY TRAINING RULES AND PROCEDURES

We will do our best to help make potty training go smoothly and quickly. Please help us by sending your child in clothes that will be convenient for us and them and make going potty many many times a day easier.

STAGE 1.

When a child starts showing interest in going potty and will potty at home at least several times a day. At this point we will follow up at day care by taking the child to the potty at set times (every hour or two) to get them comfortable and going potty consistently here. **Child is still to be brought in diapers and diapers are to be provided for the child. No pull-ups at this stage.**

STAGE 2.

When the child is going potty on a regular basis at day care and home and telling us when they need to go. At this point the child may wear pull-ups. If the child does not have bowel movements in the potty you will be asked to keep them in pull-ups until this has been mastered.

STAGE 3.

When the child is telling us and going potty consistently and also keeping the pull-up dry without many accidents. At this point child may wear panties or underwear and you may still provide pull ups for nap time if necessary. Please be sure we also have extra clothes in case of accidents.

STAGE 4.

The child is going potty on their own and wearing panties or underwear and staying dry at naptime. Congratulations!
